

Second Transnational Meeting in Foligno (Italy)

From the 21 and the 22 November 2023, partners went to Foligno in Italy in the EGInA's office. The meeting aim was to review the first part of the project, deliverables produced and the progression of the website.

It was the opportunity to discuss more about our communication strategy with the new website, and our social media. We talked about future short videos in which young people will share their social entrepreneurship experience. The aim is to enable young people to inspire others to take the plunge into the experience of social entrepreneurship and to reflect on the impact of their project on the SDGs.

From the 8th to the 12th April 2024, youth workers training will take place in Dax, in France. Each partner presented their training module during the TPM and exchanged some details related to the general organisation. The aim of this training is to help youth workers develop their skills in social entrepreneurship and the SDGs, so that they in turn can train other young people.

We had a great two days, which will be very useful for the rest of the project! The next step is to create a self-assessment tool to measure the impact of a youth project.
