# 1 Definition

This selection grid has been designed and implemented for the selection of the main definitions used in the development of this project. The subject evaluated are definitions through the essential criteria involved in this project.

ASSIGNMENT: CHOOSE FROM 1 TO 5 THE EXISTING RELATIONS BETWEEN THE DIFFERENT TERMS AND THEIR CONTEXT/ALIGNMENT								
YESSS	Solidarity	Social entrepreneurship	Social and Solidarity Economy	Social Responsibility	Social Impact	Youth worker (EU definition)	Youth work (EU definition)	TOTAL
Universal context								0
National context: Culturally Known								0
National context: Officially accepted								0
Common use								0
Easy to understand								0
Realistic								0
Updated								0
Alignment with Social Responsibility								0
Alignment with Social and Solidarity Economy								0
Alignment with the SDGs								0
<b>TOTAL</b>	0	0	0	0	0	0	0	<b>TOT</b>

## 2 Methodology

Each partner has rated the definitions from 1 to 5 for their importance with their alignment with 10 agreed fundamental criteria.

The definitions analysed have been:

- Solidarity
- Social Entrepreneurship (SE)
- Social and Solidarity Economy (SSE)
- Social Responsibility (SR)
- Social Impact
- Youth Worker (EU Definition)
- Youth Work (EU Definition)

The criteria established indicate the alignment of each definition with the use in each of the mentioned criteria:

- Universal context.
- National context/Culturally known.
- National context/Officially accepted.
- Common use.
- Easy to understand.
- Realistic.
- Updated.
- Alignment with Social Responsibility.
- Alignment with Social and Solidarity Economy.
- Alignment with the SDGs.

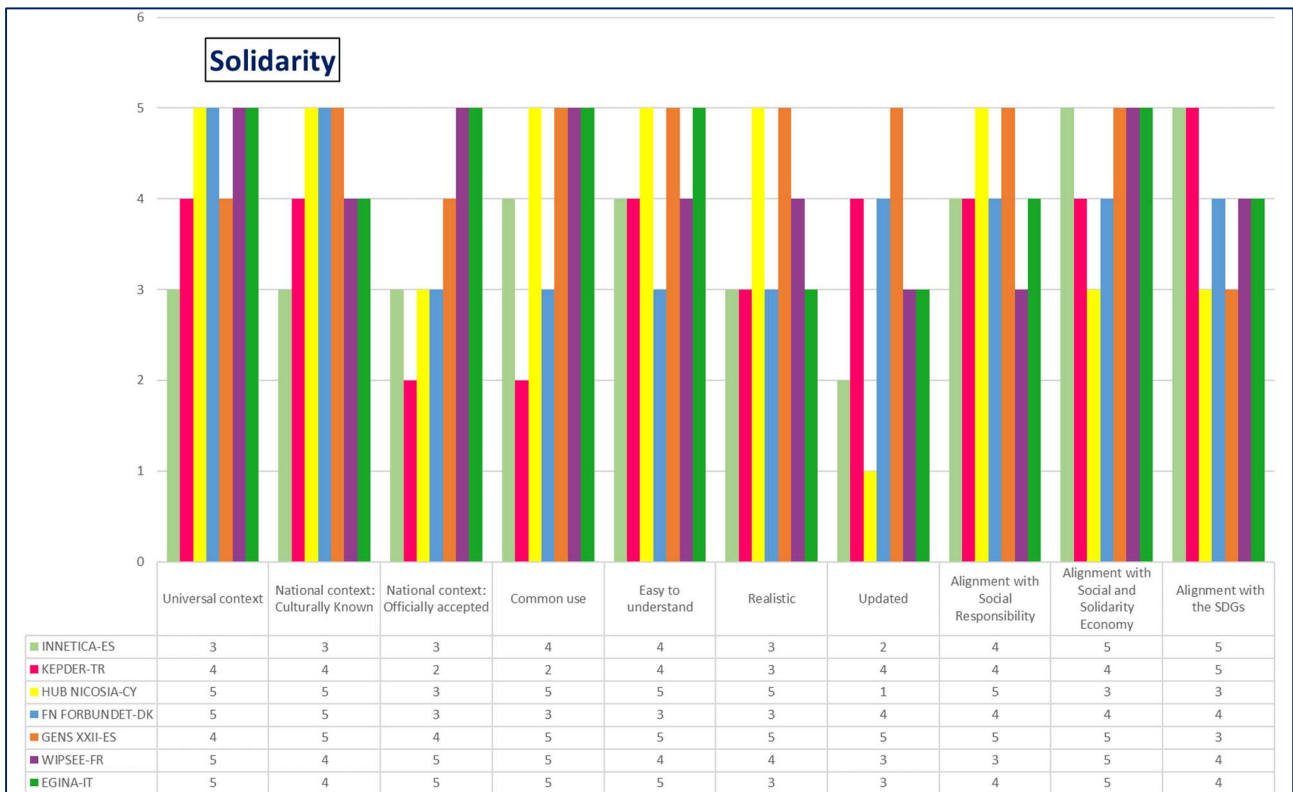

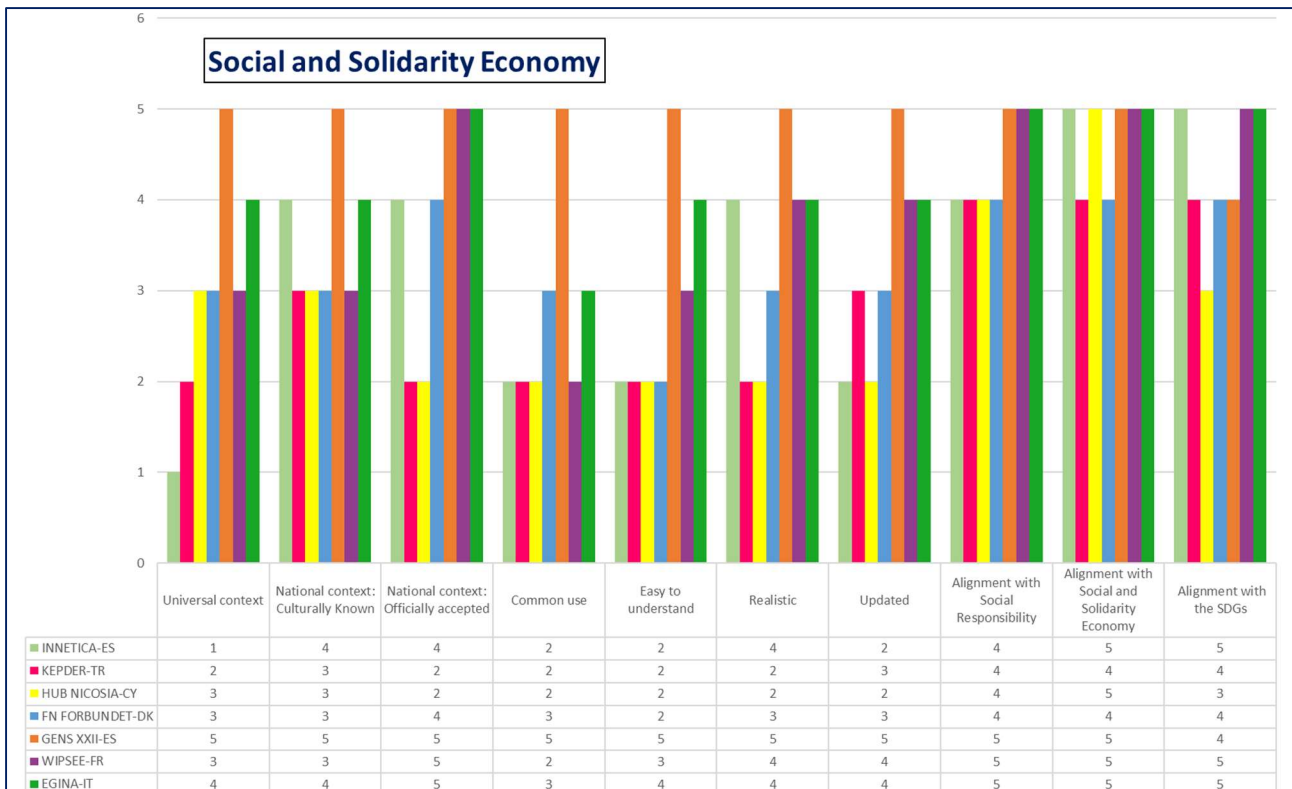

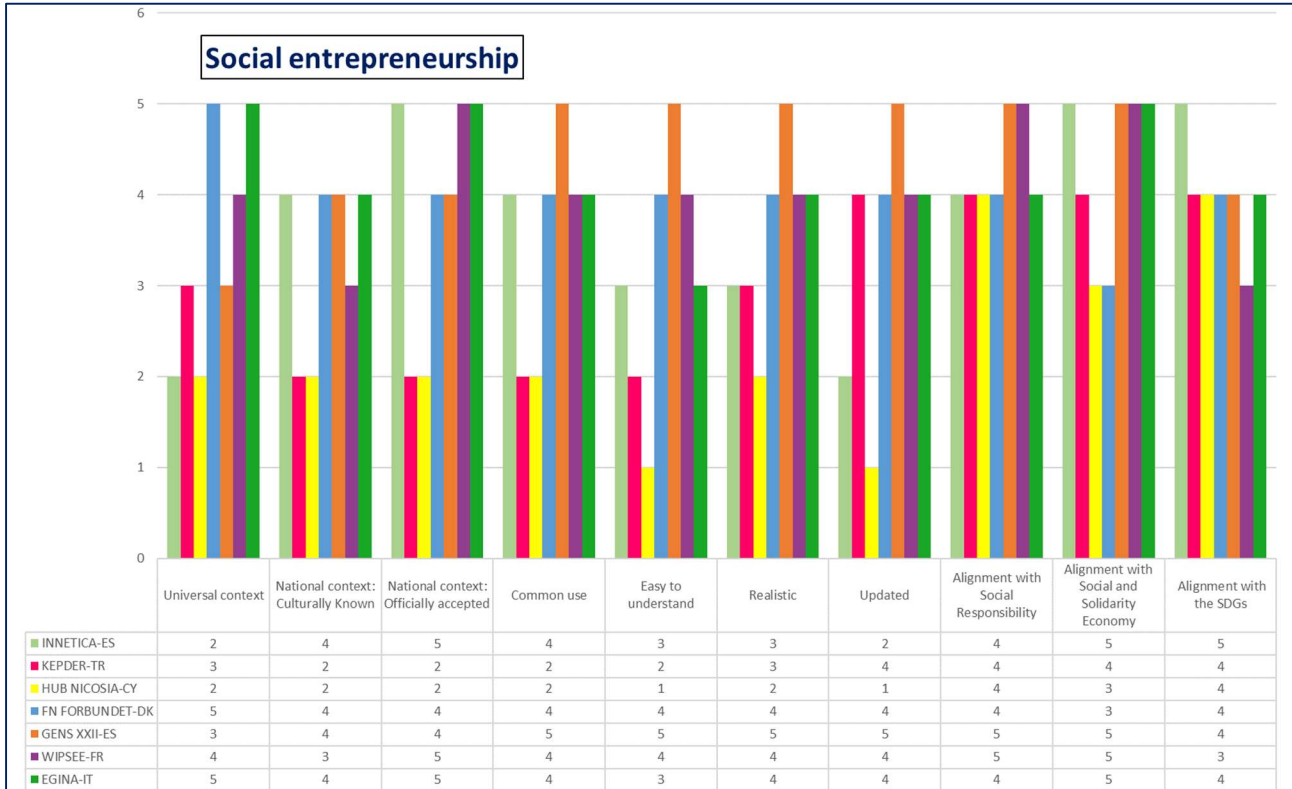

### 3 Objectives

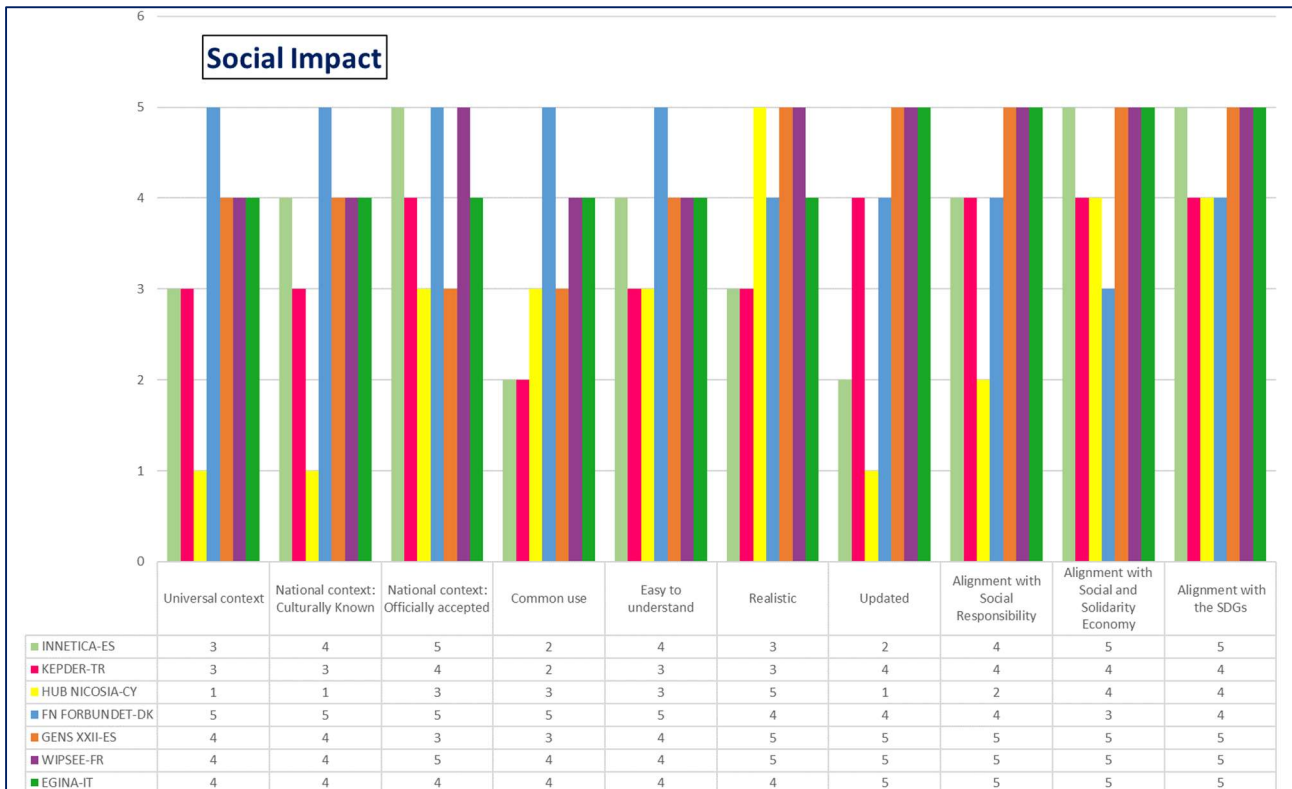

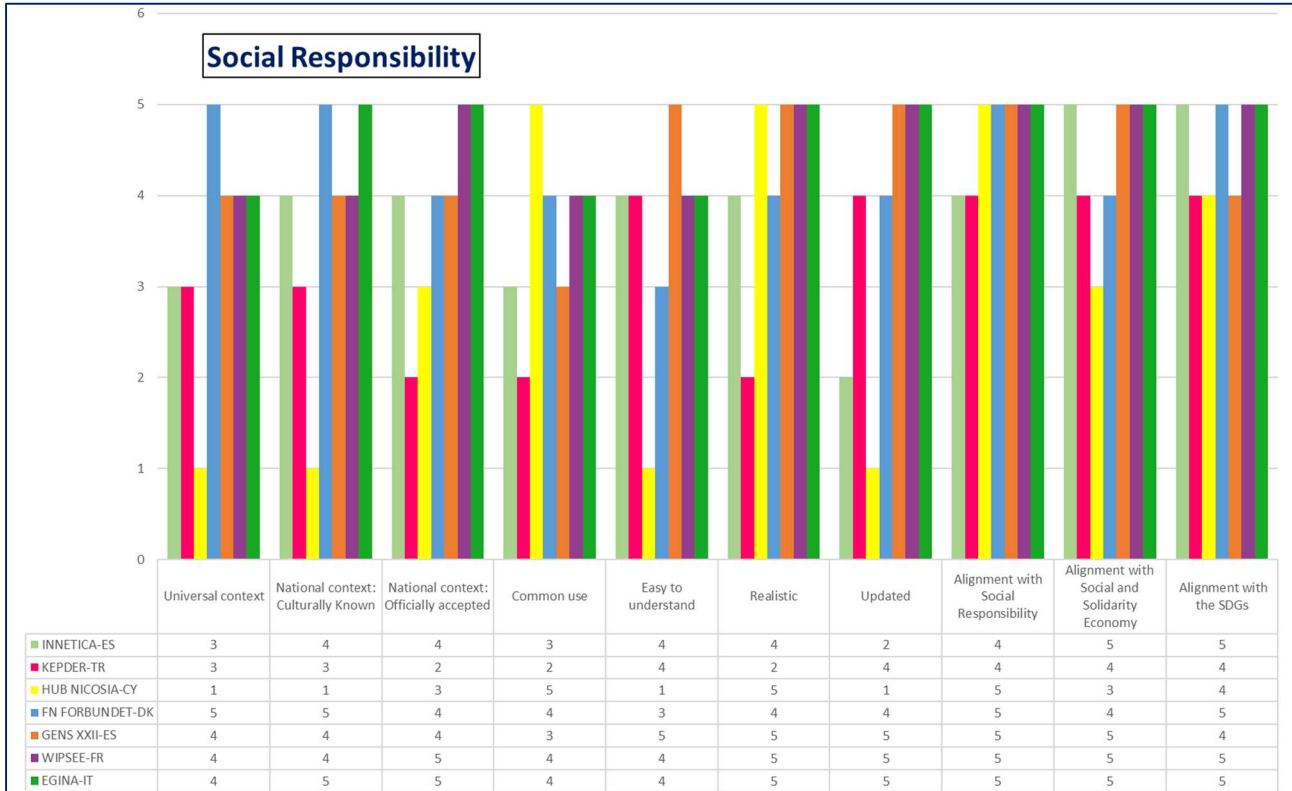

The objective is to reach an agreement between the partners for the choice of a common vocabulary for all, easily understood by users. This common vocabulary also aims to unify these definitions when working, encompassing the fundamental aspects and above all the differences in concept and use in the different countries that have worked on this project. We all agree that users in a Youth Social Entrepreneurship Training need to know the real vocabulary established in the EU and in an international environment, this way they count on universal quality information.

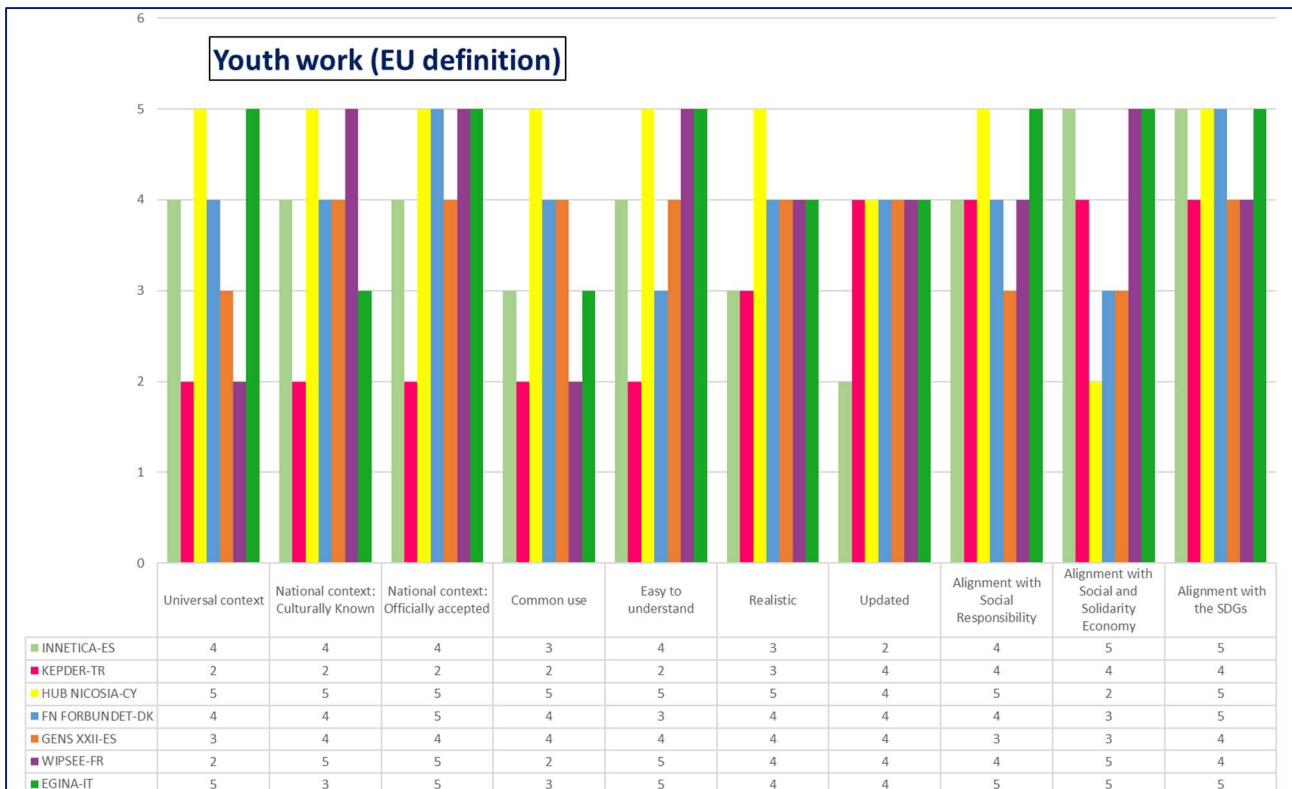

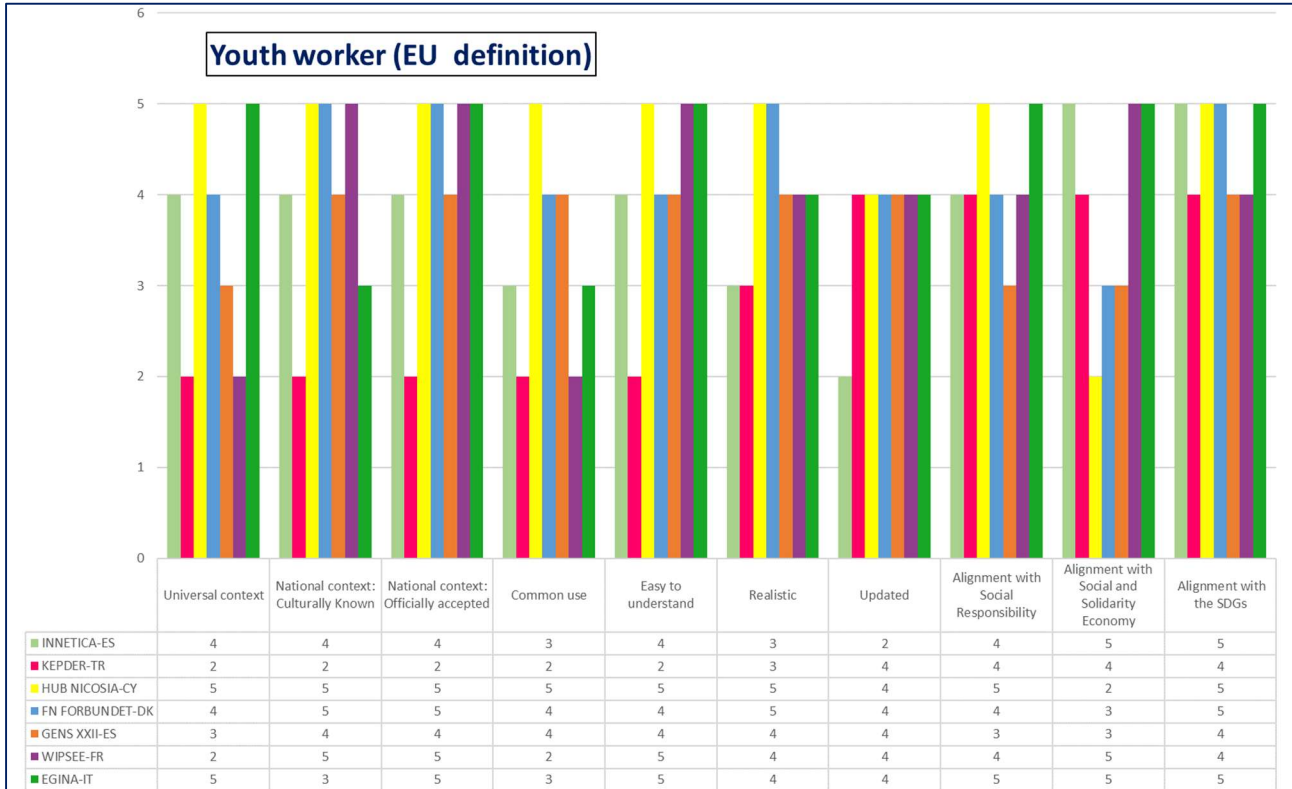

### 4 Data Charts information by definition

These charts show the information about the value that each partner gives to each established criteria to search and choose the most suitable definition for each definition or term of vocabulary to be use in this project.

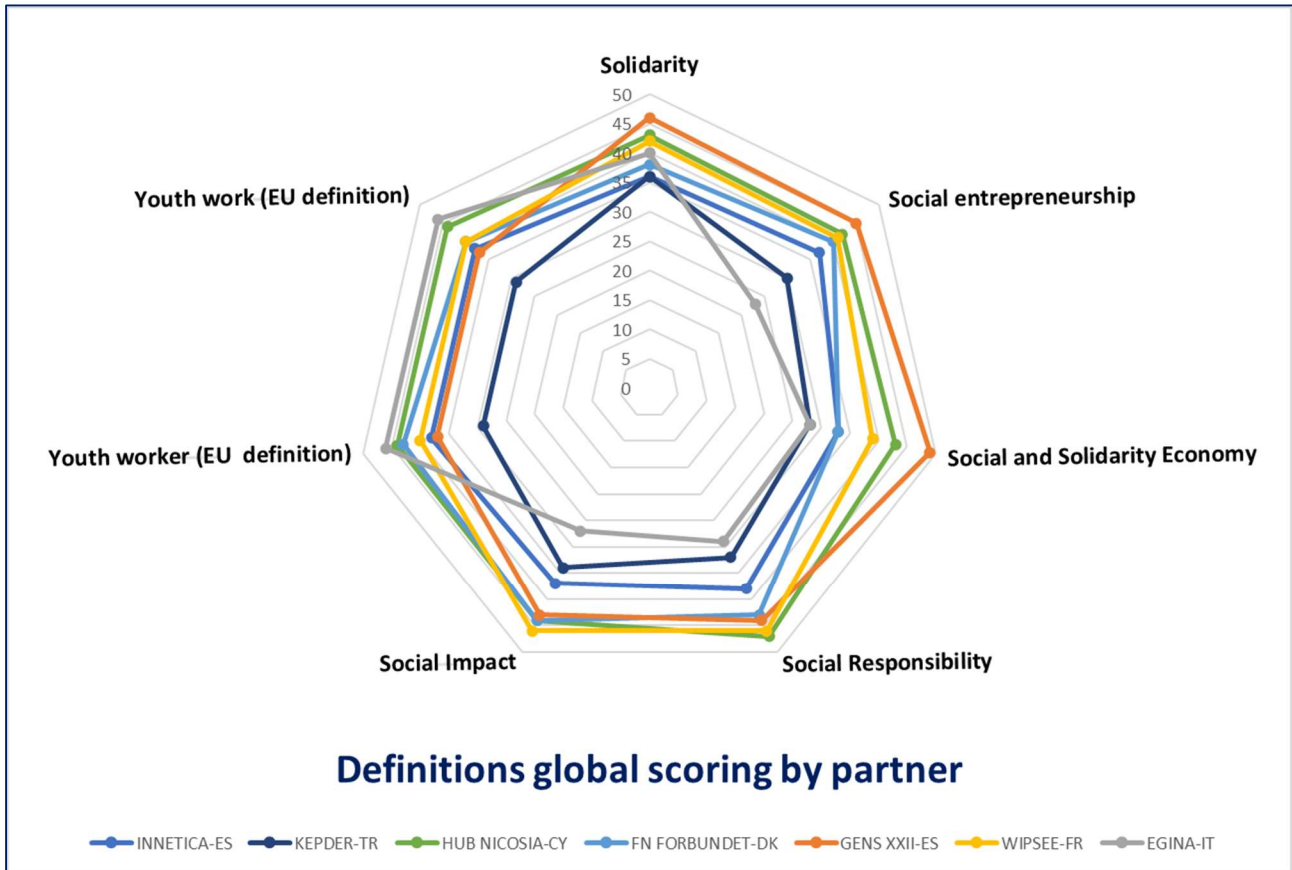

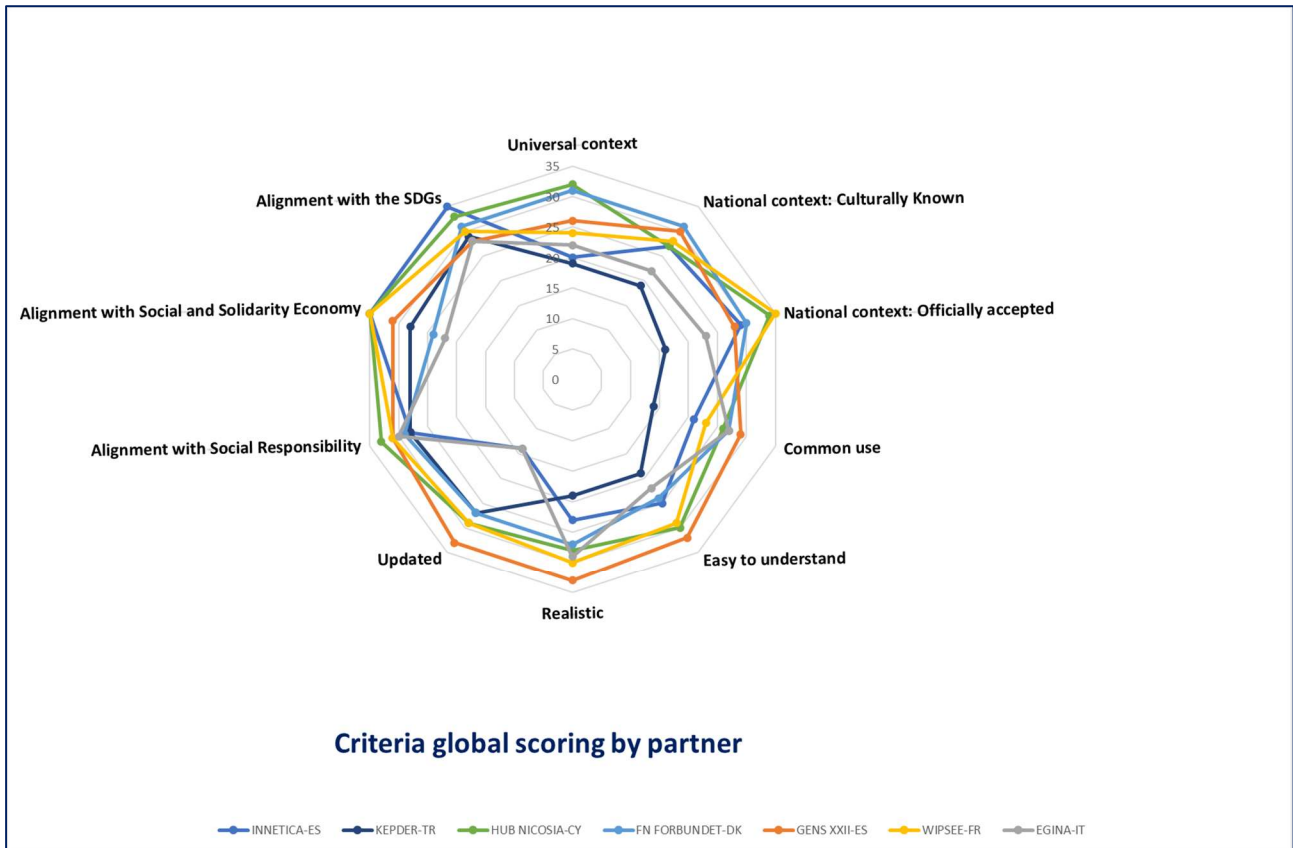

The chart below shows the partners' assessment of the definitions in relation to the different criteria. The further away the resulting value is from the centre, the more importance has been given to it.

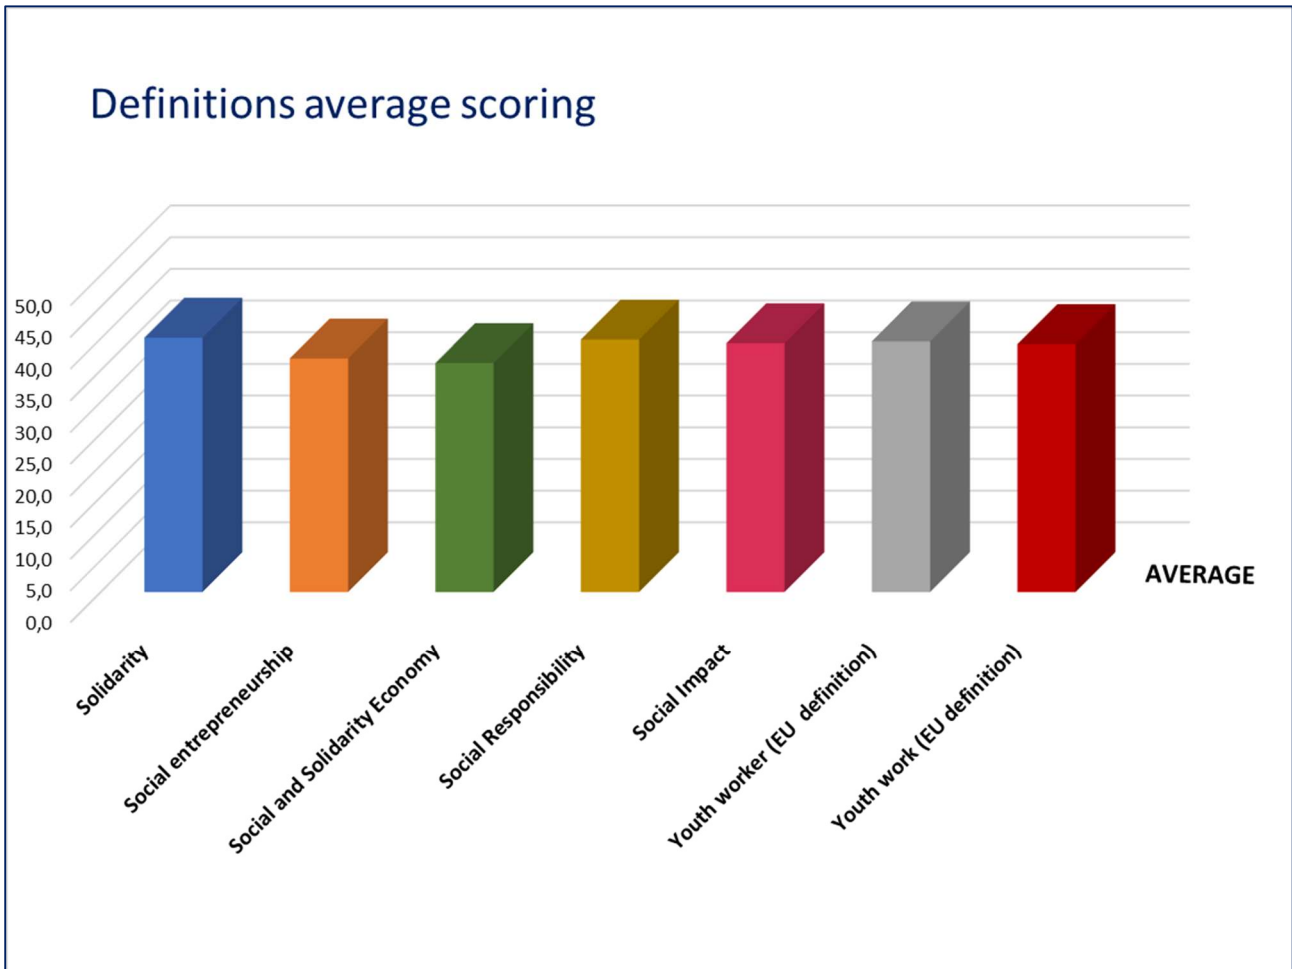

The next chart integrates the entire sum of the criteria per partner., the value that each of them give to the criteria in the evaluation. The further away the resulting value is from the centre, the more importance has been given to it.

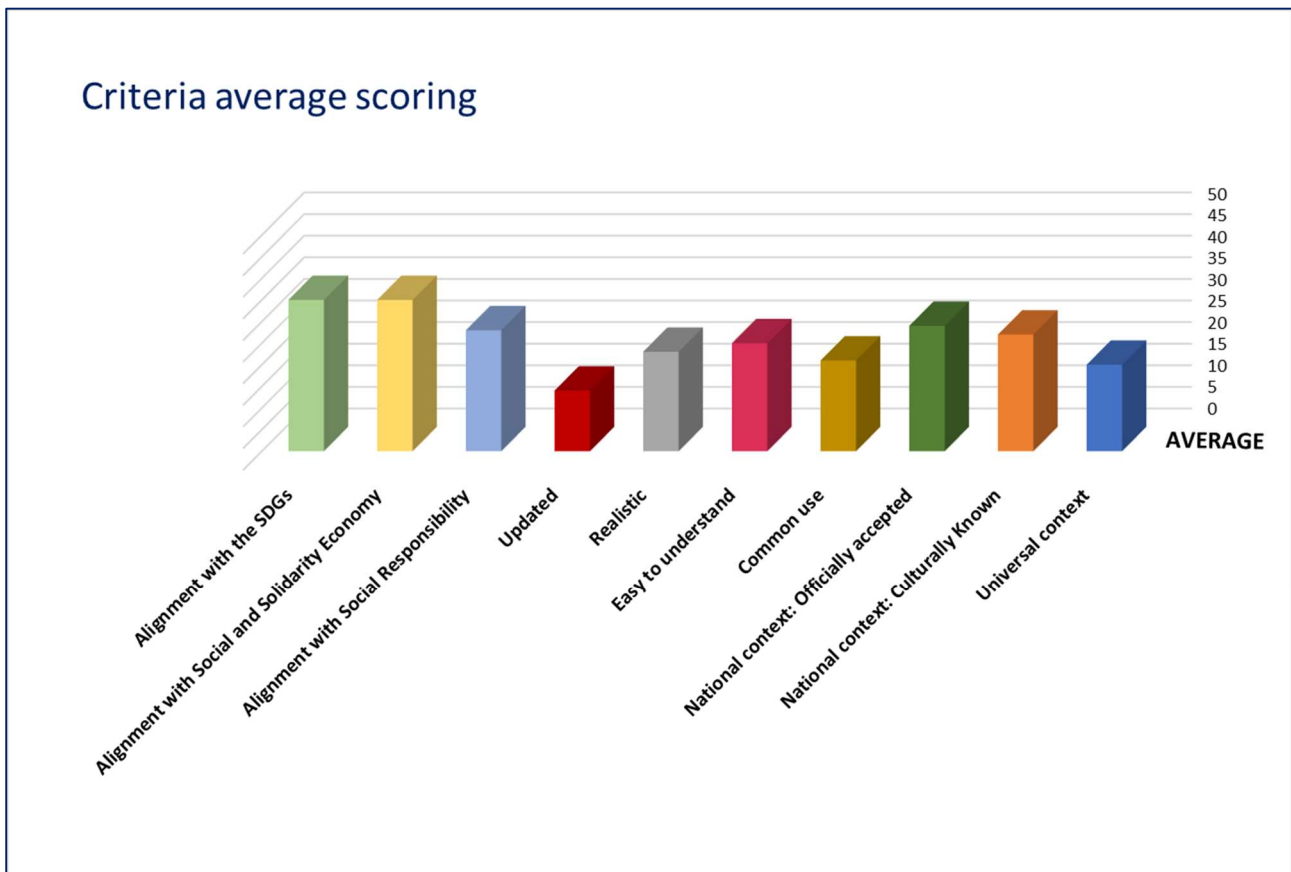

Average of the value that partners give to each definition. From the data showed we can make the conclusion that the value is very similar for all of them, in a high range of 3,6 to 4.

Average of the value that partners give to each criterion. From the data showed we can make the conclusion that the values given are very different. The valuable criteria are: Alignment with the SDGs, Alignment with Social and Solidarity Economy, Alignment with social Responsibility and National context – Officially accepted. The less valuable ones are: Updated, Common use and Universal Context.

## 5 Conclusions

All partners agree that all definitions proposed to establish a common vocabulary are of equal importance. So, all of them will be incorporated into the dictionary of terms prepared for this project.

In relation to the criteria that these definitions must contain, they must be aligned with the SDGs, Social and Solidarity Economy, Responsibility and National context – Officially accepted. The other ones are accessories and will be considered to decide between several definitions as a plus.

Definitions are shown in the document “Definitions Selection Grid and in the Dictionary.
